Docket No: ST01015USU (133-US-U1)
Serial No.: 10/051,726

AMENDMENTS

TO THE SPECIFICATION

Please amend the specification as follows:

Please delete the first paragraph on page 8, lines 1-4, and replace it with the following paragraph:

-- When V2 112 is connected to the source of Q1 202 as shown in FIG. 2, current flow from V2 ~~[[212]]~~112 can be prevented by lowering the gate voltage present at Q1 202 to a point where V_{gs} exceeds the necessary threshold for a pinch-off condition to occur. Thus, when the desired voltage source V1 110 is present, it is desirable to have the gate of Q1 202 at zero volts (0V). --
